Paeds Sepsis Screening Tool

Column A		Column B	
Core Temp <36C or >38.5		**Central cap refill >2secs**	
Age corrected Tachycardia		**Altered mental state**	
Age corrected Bradycardia (under 1 year only)		**Spreading non-blanching rash**	
Age corrected tachyopnea		**Rigors (observed or reported)**	

If 1 criteria in A, but none in B, then manage as per triage only		
If ≥ 2 criteria in A, but none in B, Give Antipyretic & reassess in 30 mins		
At 30 min reassessment:	if obs now normal & no B criteria, then manage as per triage	
	If temp still high & obs abnormal but no B criteria, reassess in further 30 mins (repeat until Temp normal)	
	If temp normal but abnormal HR or RR then initiate **Paeds Sepsis Care Pathway**	
If any B criteria at any stage , initiate Paeds Sepsis Care Pathway
