

Sensory Processing Parent's Workshop

What to expect:

- To learn more about how we and our children sense and experience the world around us
- To explore and compare our sensory preferences to our children's sensory preferences
- To explore and consider how a child's sensory preferences may be affecting their behaviour and ability to engage in everyday tasks
- To identify a functional goal for you and professionals working with your child to focus on
- To identify strategies which will help your child achieve this goal

Workshops are run over two mornings/afternoons; you will need to attend both dates.

Spaces fill up fast. For enquiries regarding referrals for and dates of workshops please phone

Admin on: **0203 3161892**

Unfortunately we do not have any crèche facilities; the workshop is for adults only

Please ensure you have made childcare arrangements before attending the workshop

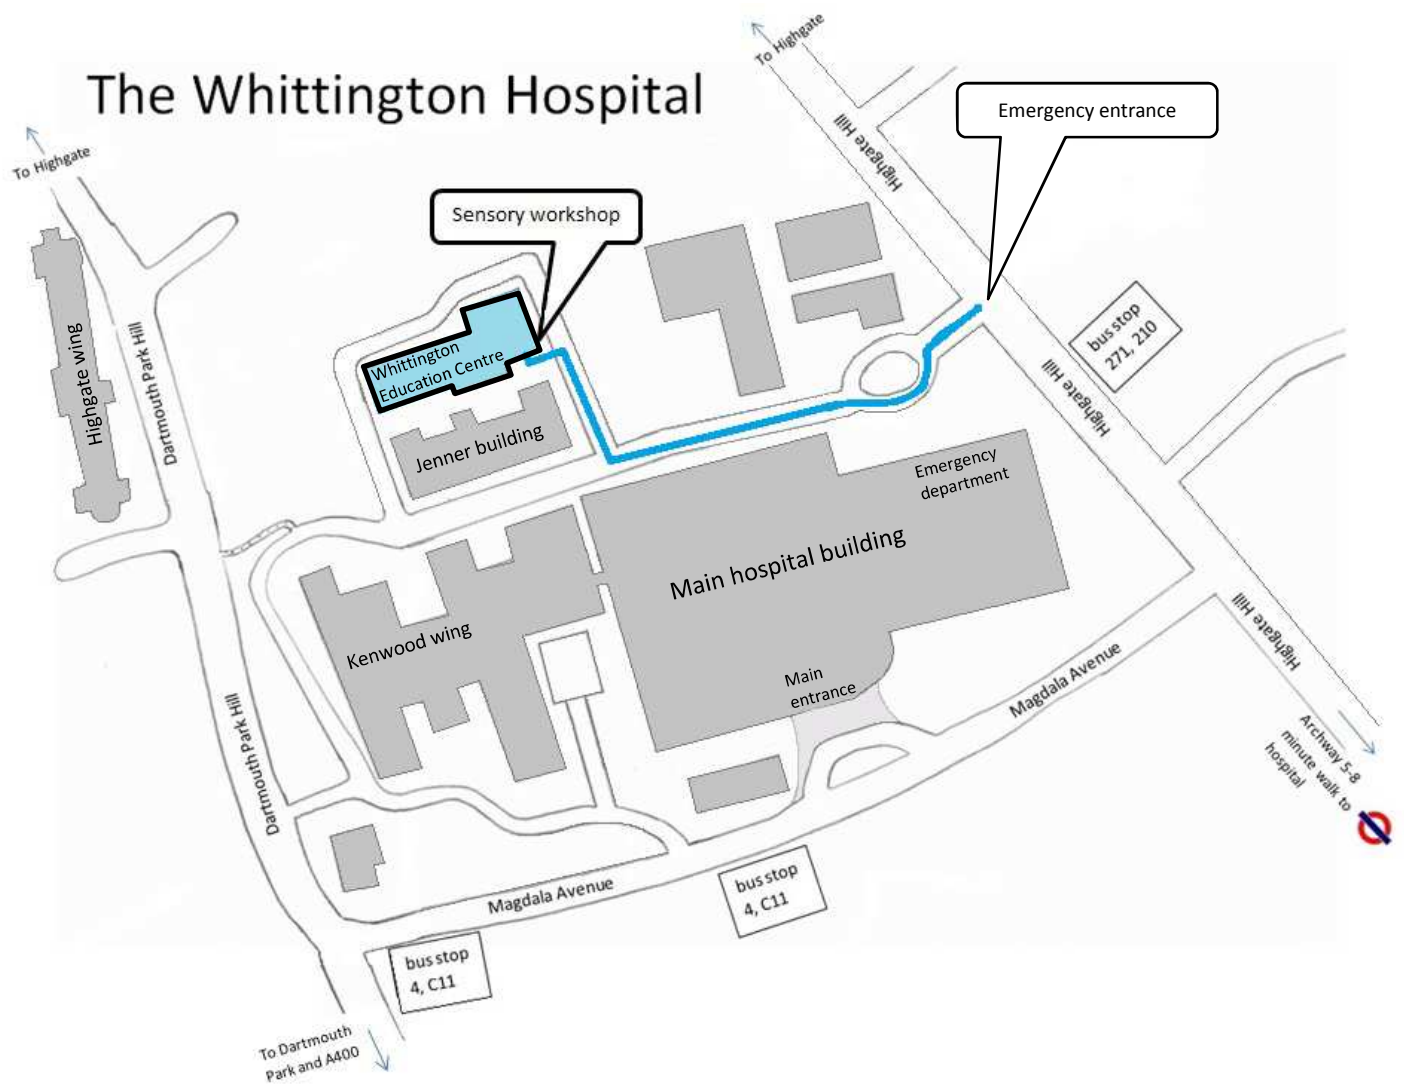

Remember to invite anyone who plays a significant role in the care of your child, such as a teaching assistant or grandparent.

Phone Admin on: **0203 316 1892**

Location: Whittington Hospital
Magdala Ave
London
N19 5NF

Room: WEC – Whittington Education Centre, behind Hospital
